

PANAGIOTIS KAIMASIDIS

Mechanical & Aeronautical Engineer (MSc) • Process & Operations Specialist

Athens, Greece | +30 6980423845 | panagiotiskaimasidis@gmail.com | linkedin.com/in/PKaimasidis

ENGINEERING & FMCG MANUFACTURING EXPERIENCE

PROCTER & GAMBLE (P&G) — Project Management & Engineering Intern Brussels, Belgium | Aug 2024 – Dec 2024

- **Process Optimization:** Redesigned chemical storage and fluid workflows, eliminating operational bottlenecks and expanding dosing capacity by 400% through high-efficiency modular infrastructure.
- **Data-Driven Controls:** Integrated inline flowmeter systems and automated sensor feedback loops to optimize process parameters, maximize dosing accuracy, and significantly reduce process upsets.
- **Reliability & Availability:** Analyzed, classified, and catalogued critical engineering spare parts while qualifying alternative technical vendors, mitigating supply risks and reducing potential equipment downtime.
- **Digital Transformation:** Architected and deployed advanced computer vision quality control (QC) systems on production lines, cutting manual inspection cycles, minimizing waste, and boosting automated error detection.

NEW MUNICIPALITY COURT OF PIRAEUS — Health & Safety Engineer (Freelance) Piraeus, Greece | Dec 2025 – Present

- **Operations Leadership:** Directing end-to-end health, safety, and environmental operations for the first LEED-certified public facility in Greece, governing safety standards for a daily site workforce of over 400 personnel.
- **Standardized Compliance:** Authoring and executing rigorous site-wide safety protocols, hazard assessments, and operational monitoring metrics to achieve strict alignment with green building standards and national regulatory compliance.

HELLENIC AIRFORCE — Aeronautical Engineer Intern Andravida Air Base, Greece | July 2023 – Aug 2023

- **Troubleshooting & RCA:** Executed complex 2nd-degree maintenance actions and systematic Root Cause Analysis (RCA) on F-4 Phantom (J-79) turbojet engines to restore baseline operational and asset conditions.
- **Run to Standard:** Conducted comprehensive ground testing and real-time performance logging of overhauled propulsion units to validate technical parameters and guarantee flight-readiness to absolute military standards.

LEADERSHIP & BUSINESS EXPERIENCE

EUROAVIA — Business Relations Coordinator & Treasurer Patras, Greece | 2020 – Present

- **Sponsorship & Negotiation:** Formulated and executed corporate contract negotiations, successfully securing over €60,000 in industrial backing from major engineering and commercial partners.
- **Financial Governance:** Managed comprehensive budget allocations, treasury books, and strict operational expenditure controls for the local branch to optimize cash flow and resource distribution (2021–2022).

EDUCATION

UNIVERSITY OF PATRAS — MSc in Mechanical & Aeronautical Engineering Patras, Greece | Graduated: Oct 2025

- **Academic Standout:** Graduated with an excellent overall score of **8.36 / 10**.
- **Master's Thesis:** *"Wire DED Additive Manufacturing Process Model for Part Quality Optimization"* — Built advanced physics-based numerical simulations (C) to forecast thermal dynamics, mitigate material defects, and optimize process execution parameters.

TECHNICAL SKILLS & LANGUAGES

Core Engineering: Process Optimization, Loss & Waste Reduction, Root Cause Analysis (RCA), QA Automation, Supply Chain Resilience, 5S Standards, Run to Standard (R2S), Asset Reliability.

Software Tools: Siemens Teamcenter (PLM), CATIA V5, AutoCAD, Unity (AR), MATLAB, Python, C, C#.

Languages: English (Proficient / Michigan Proficiency), French (Competent / DELF B2), Greek (Native).
